As a dedicated Game Design student from Wilfrid Laurier University, I am eager to bring my passion for coding, coupled with my strong communication and teamwork skills, to a starting position in the field of game design/programming. Seeking an opportunity to possibly leverage my customer service background, technical proficiency in JavaScript, Python, HTML5, CSS, and expertise in Unity and C#. I aim to contribute innovative ideas and collaborative solutions to a forward-thinking development team.

Highlights of Qualifications

- Experienced in customer service
- Good with instructions
- Strong Time Management
- Adaptable and Dependable
- Effective Communication
- Proficient in JavaScript, Python, HTML5, CSS
- Unity and C# Expertise

Relevant Skills

Programming Skills: Starting from high school I gained experience with coding languages like JavaScript and Python along with HTML and CSS. And throughout university I learned C# through the Unity Engine and deepened knowledge on web coding.

Communication Skills: Demonstrated effective team communication at the University of Waterloo as a theatre usher. Communication with elderly folk, some of whom are non-verbal. Excellent communication with kids shown during my time as a summer camp counsellor.

Time Management Skills: Honed through numerous jobs and during university studies.

Problem Solving Skills: Applied in many job positions and further developed during university studies and through the practice of coding and programming.

Game Design Experience: Studying Game Design at Laurier, with practical experience in JavaScript, HTML5 and Unity with C#. Along with experience on board game design and escape room design. All built on a solid foundation of game design fundamentals.
