As a dedicated Game Design student from Wilfrid Laurier University, I am eager to bring my passion for coding, coupled with my strong communication and teamwork skills, to a starting position in the field of game design/programming. Seeking an opportunity to leverage my customer service background, technical proficiency in JavaScript, Python, HTML5, CSS, and expertise in Unity and C#. I aim to contribute innovative ideas and collaborative solutions to a forward-thinking development team.

Highlights of Qualifications

- Proficient in JavaScript, Python, HTML5, CSS
- Unity and C# expertise
- Experienced in customer service
- Excellent with instructions
- Strong time management
- Adaptable and dependable
- Effective communication

Community and Work / Volunteer Experience

Gro-Pro Landscaping & Lawn Care - Snow and Ice Maintenance Technician

Elmira, ON | November 2024 - April 2025

- Removed snow and ice efficiently and effectively on multiple scheduled routes.
- Drove company truck and trailer around Elmira and to St Jacobs & strived to complete work with excellent results.
- Dependable and reliable while “on-call” at all times.

KeepRite Refrigeration - Heavy Assemblyman

Brantford, ON | May 2022 - August 2022 & May 2023 - August 2023

- Working in a seasonal position, I produced quality work in a fast-paced, physically demanding environment.
- Quickly learned and applied job-specific skills and techniques, including use of power tools, following schematics, and working around heavy machinery.
- Praised for strong work ethic through consistent performance and dedication.

Brick Works Academy - Camp Instructor

Waterloo, ON | July 2021 - August 2021

- Taught game design fundamentals and teamwork to children aged 6-14, including those with learning disabilities.
- Used Fortnite Creative Mode to introduce principles of game design.
- Fostered strategy and collaboration through team-based Esports activities.

University of Waterloo Humanities Theatre - Theatre Usher

Waterloo, ON | December 2017 - May 2021

- Assisted patrons with seating and resolved general admission challenges efficiently.
- Managed difficult behaviour from patrons and addressed issues during performances/intermissions.
- Collaborated effectively with a team of ushers to ensure smooth operations.

University of Waterloo Centre for Community Mapping - Research Assistant

Waterloo, ON | March 2018 - May 2018

- In a co-op position, I worked on PHP, SQL, and metadata-related tasks for ongoing projects.
- Managed web drivers and networking, documenting code and files for team use.
- Communicated technical progress effectively with colleagues.

Parkwood Mennonite Home - Restorative Care Assistant

Waterloo, ON | November 2016 - September 2018

- Supported residents with exercises, activities, and daily walks.
- Assisted with technology-related issues for staff and residents.
- Provided safe transportation to and from in-house church services.

Relevant Skills

Programming Skills: Starting from high school I gained experience with coding languages like JavaScript and Python along with HTML and CSS. And throughout university I learned C# through the Unity Engine and deepened knowledge on web coding.

Game Design Experience: Studying Game Design at Laurier, with practical experience in JavaScript, HTML5 and Unity with C#. Along with experience on board game design and escape room design. All built on a solid foundation of game design fundamentals.

Communication Skills: Demonstrated effective team communication at the University of Waterloo as a theatre usher. Communication with elderly folk, some of whom are non-verbal. Excellent communication with kids shown during my time as a summer camp counsellor.

Time Management Skills: Honed through numerous jobs and during university studies.

Problem Solving Skills: Applied in many job positions and further developed during university studies and through the practice of coding and programming.
